Profile

I am a dedicated and self-motivated IT undergraduate with a strong foundation in front-end development, particularly in the React JS framework. I have extensive hands-on experience in building dynamic, user-centric web applications. My technical proficiency includes working with Tailwind CSS, Node.js, and a variety of other tools and technologies. I am passionate about solving complex problems and eager to contribute to a team's success by leveraging my strong communication and collaboration skills

Education

B.Sc. (Hons) in Computing and Information Systems

Sabaragamuwa University of Sri Lanka

Current GPA - 3.81

2022- present

G.C.E Advanced Level

De Mazenod College, Kandana

Physical science stream

2019

Projects

rn_credit_card_flip

- A React Native package providing a seamless and visually appealing way for users to enter their credit card information. Featuring an interactive flip animation, the component allows users to input both the front and back details of their credit card effortlessly.

React-native Nodejs

Pearl Group

- Is a comprehensive platform for tour operators to manage and organize tours. It offers features such as tour package creation, itinerary customization, and pricing management. Customers can search for and book tours based on their preferences.

My contributions

- Developed the frontend using reactjs.
- Integrated JWT authentication for user authentication.
- Designed and managed the API clients and responsible for managing tokens and facilitating communication with REST APIs.

Mern React Nodejs MongoDB

Pearl Admin Dashboard

- A powerful dashboard designed to streamline the management of travel-related tasks. Build using Reactjs, MongoDB, express, nodejs and redux tool kit. Used material UI for styling.

- Task Management - Easily create, edit, and delete travel-related tasks. Assign tasks to different users and track their progress.
- Itinerary Planning - Plan detailed itineraries, including travel dates, times, destinations, and activities. Keep all your travel plans organized in one place.
- Real-time Updates - Stay updated with real-time notifications and alerts for task updates and changes in travel plans.
- User Collaboration - Collaborate with other users, share travel plans, and manage group trips effectively.
- Data Visualization - Utilize interactive charts and graphs to visualize travel data and gain insights into your travel plans.

Mern React Nodejs MongoDB

NexPay

Group

• NexPay is a cutting-edge digital payment application designed to revolutionize how users manage their financial transactions. With a focus on convenience, security, and versatility, NexPay offers a user-friendly experience for individuals seeking an efficient solution for their everyday payments.

My contributions

- Created the user authentication and authorization system using JWT with two factor authentication system for enhanced security of the app
- Designed the login, signin and addcard screens with dynamic and user friendly interfaces.
- Developed the user add card feature with a flip animations for more appealing way.
- Authentication of the card with the stripe payment gateway.

React-native Nodejs MongoDB Stripe

MediTech

Group

• Designed to streamline the process of scheduling and managing doctor appointments. Also, provides a modern and efficient solution for both healthcare providers and patients.

My contributions

- Developed frontend user interface with reactjs
- Designed and develop the backend authentication, controls, middleware and the data schemas and data storage system using mongodb.
- Integrated strip payment to handle user payments.
- Designed the admin dashboard for doctors, enables the doctors to view their booking and mange the appointments

React Nodejs MongoDB Stripe

Travel Lanka

• Innovative mobile application designed to cater to all your travel needs across Sri Lanka. Developed using Android Studio and Java, this app combines powerful functionalities with a user-friendly interface to enhance your travel experience and make exploring Sri Lanka seamless and enjoyable.

- Explore detailed information about tourist attractions, including historical background, opening hours, admission fees, and visitor reviews.
- Gives the users about a detailed map on the historic and tourist attract places.

Android Studio - Java

Society of Computer Sciences

 2022 - present

Active member

Tech-Skills

Programming Languages

C, JavaScript, TypeScript, Java, PHP, Python, HTML, CSS

Frameworks and libraries

ReactJs, React-Native Express.js, Next.js, Bootstrap

Databases

MySQL, MS SQL, PostgreSQL, Firestore, MongoDB

Technologies and Tools

Firebase, Git (Version controlling), Postman, Figma, Cisco Packet Tracer, Trello, Repository Pattern, MVVM

Soft-Skills

Teamwork	Communication	Decision making
Creativity	Organization	
Leadership	Adaptability	
Public speaking	Problem solving
